LAB CONSUMABLES  
CATALOGUE

AHN Biotechnologie GmbH, is a trusted **German manufacturer of life sciences** consumables and benchtop equipment with over **25 years** of experience. Based in Nordhausen, our in-house automation expertise **reduces investment requirements** and saves costs and streamlines project timelines.

Our state-of-the-art facilities in Nordhausen operate around the clock and utilise advanced technologies, including robotic systems, to produce DNase- and RNase-free products. Our diamond-polished Swiss moulds ensure maximum sample recovery and **high-precision pipetting**. Our fully equipped tool room allows us to swiftly respond to the evolving needs of the industry. At AHN, we are committed to innovation, quality, and delivering excellence through our **German-made products**.

# Our Certifications

## – Committed to Quality and Sustainability

At AHN Biotechnologie GmbH, we prioritise quality, sustainability, and compliance with international standards. Our certifications reflect our dedication to environmentally-conscious and precise operations:

- **Green Electricity Certificate:** Our entire production is powered by 100% green electricity, contributing actively to environmental protection and reducing our carbon footprint
- **Cleanroom Certificate:** We ensure production under stringent cleanroom conditions, with manufacturing in Cleanroom Class 7 and production in Cleanroom Class 9, meeting the highest quality standards
- **Grüner Punkt (Green Dot):** With the Green Dot certification, we emphasise sustainable packaging and recycling. We take responsibility for the environmentally-sound disposal and reuse of our products
- **ISO 9001:2015:** Our quality management system is certified according to the internationally-recognised ISO 9001:2015 standard, ensuring consistent quality and continuous process improvement

These certifications underline our commitment — products you can trust, manufactured with a respect for the environment and designed to exceed your expectations for quality.

# Sustainability

At AHN Biotechnologie GmbH we model our commitment to sustainable production through our environmentally friendly manufacturing practices and products.

We have a wide range of sustainable laboratory consumables expertly crafted to help you reach your sustainability goals while practicing excellent science.

5

**100%**  
electrical injection moulding

= 40% less electricity consumption  
compared to hydraulic machines

**100%**  
recycled plastic

in production of AHN rack boxes

**100%**  
reusable racks

suitable for multiple  
autoclaving cycles

**65%**  
space saved

when using a reload system  
- reducing packaging and transport

**59%**  
plastic saved

when using a reload system

**Zero**  
additional plastic ingredients

packs, inserts and reloads are made  
entirely from recyclable polypropylene

**Unlimited**  
upcycling options

for reusing tip racks as  
storage solutions

# Purification

Engineered for trust,  
driving results you can  
always depend on

# ahn<sup>®</sup>myTube

## Spin Column System SC

**Spin column system** - consists of a 0.8 mL filter tube (round bottom design) equipped with corresponding filter (see filter options below) and a 2.0 mL receiver tube

**Elimination of risk of contamination or loss of sample** - high-quality raw material meets purity standards, highly resistant to extreme mechanical strain and has excellent chemical resistance

**Centrifuge specifications:** spins up to 25000 x g with a fixed angle rotor, or up to 30000 x g with a swing out rotor

7

# ahn<sup>®</sup>myPlate

## Microfilterplate System FP

**Microfilterplate** - 8x12 matrix, 96 individual drip directors, 1.0 mL capacity, in accordance with SBS-Standard. Equipped with the corresponding filter (see filter options below)

**Elimination of any risk of sample contamination** - manufactured from absolutely clear high-quality virgin polystyrene

| Filter Options                                                                                                                                                                                                                            | SC | FP |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|----|
| <b>Glass fibre (GF) filter characteristics</b> - recommended for the purification of DNA and RNA / prefiltering of dirty solutions / rapid flow rate and high particle loading capacity                                                   | ■  | ■  |
| <b>Polyethylene (PE) filter characteristics</b> - suitable for particle-removing coarse filtration / can be used both as a prefilter or as support filter in combination with other filters / hydrophobic / very good chemical resistance | ■  | ■  |

Further filter options are available on request:

- Nylon - recommended for filtering protein-free culture media
- Cellulose Acetate - recommended for applications requiring low protein binding
- Regenerated Cellulose - suitable for particle removal from solvents
- Polyvinylidene Fluoride - used in general filtration and sample preparation applications

# ahn® myTip

## Pipette Tips

10

**Optimised fit and easy tip ejection** - improved cone geometry for a secure fit

**Quick and easy volume check** - graduation marks on tip at standard volumes

**Precise pipetting without loss of sample** - conical tip opening prevents drop formation at the end of the tip

**High-quality material** - tips made of autoclavable, non-wettable, virgin polypropylene. US FDA Virgin Polypropylene without any traces of heavy metals (FDA approved 21 CFR)

**Easy identification of pipette tips** - colour-coded racks allows the quick and easy identification of the pipette tip and a suitable pipette

**Maintain sample integrity** - sterile version available (beta irradiation)

**Versions** - available in bags and rack boxes

**Compatibility list** - see page 93-96

# ahn® myTip

## Macro Tips MaT

**Optimised cone geometry** - ensuring perfect fit on the chosen pipette

**Precision without loss of sample** - conical tip opening to avoid formation of drops

**Elimination of sample contamination** - tips made of autoclavable, non-wettable, virgin polypropylene material

**Maintain sample integrity** - sterile version available (beta irradiation)

**Packaging** - available in bags

**Compatibility list** - see page 93-96

**No sample contamination** - filters are made of virgin high-quality hydrophobic polyethylene without additives

**No pipette contamination** - filter provides reliable protection against contamination through micropore filter technology (MPF technology, filter pore size 10-40 µm)

**Universal fit and tip ejection** - optimised cone geometry for a secure fit

**Quick and easy volume check** - graduation marks on tip at standard volumes

**Precise pipetting without loss of sample** - conical tip opening prevents any formation of drops at the end of the tip

**Elimination of sample contamination** - tips made of non-wettable, virgin polypropylene

**Easy identification of pipette tips** - colour-coded racks allows the quick and easy identification of the pipette tip and a suitable pipette

**Maintain sample integrity** - sterile version available (beta irradiation)

**Versions** - available in bags and rack boxes

**Compatibility list** - see page 93-96

| Filter                                                                              | Average pore size | Material | Characteristic | Used in following filter tip |

**Low retention tips and filter tips** - the innovative low retention surface ensures maximum sample recovery and high-precision pipetting

**Universal fit and tip ejection** - optimised cone geometry for a secure fit

**Quick and easy volume check** - graduation marks on tip at standard volumes

**Precise pipetting without loss of sample** - conical tip opening prevents any drop formation at the end of the tip

**Elimination of sample contamination** - tips made of autoclavable, non-wettable, virgin polypropylene

**Maintain sample integrity** - sterile version available (beta irradiation)

**No sample contamination** - filters are made of virgin high-quality hydrophobic polyethylene without additives

**No pipette contamination** - filter provides reliable protection against contamination through micropore filter technology (MPF technology, filter pore size 10-40 µm)

**Easy identification of pipette tips** - colour-coded racks allows the quick and easy identification of the pipette tip and a suitable pipette

**Versions** - available in bags and rack boxes, tips and filter tips

**Compatibility list** - see page 93-96

# Cleaner, greener transport

## – reducing our carbon footprint

16

Over the last few years we have worked hard to hone our skills in sustainable production, and one barrier we have overcome is that of product shipping.

With our revolutionary reload system, we have been able to save **65% more space** on each shipping consignment and save valid benchtop space in your laboratory!

Consequently, this has reduced our overall carbon footprint in shipping and other transportation.

# ahn<sup>®</sup>myTip

## Reload System RL

**Eco-friendly and cost-effective tip management solution** – each reload tower accommodates multiple insert plates of refill tips. This minimises plastic waste **by approximately 70% per pack** and reuses the current AHN myTip<sup>®</sup> RB rack boxes by simply replacing empty plates with full ones from the AHN myTip<sup>®</sup> RL reload towers

**Secure fit of pipette tips** – pipette tips sit stable and secure in the insert plate, enabling easy handling with multi-channel pipettes

**Secure and comfortable handling** – AHN myTip<sup>®</sup> RL insert plate securely snaps into the rackbox but can be easily removed again. To facilitate the handling for users with small hands, the tabs of the AHN myTip<sup>®</sup> RL insert plate are located on the longer side

**Easy identification of pipette tips** – colour-coded racks allows quick and easy identification of the pipette tip, and therefore a suitable pipette

**Space-saving** – small footprint of the AHN myTip<sup>®</sup> RL reload towers means there is more space both on the benchtop and in the storage room

## Rack Box System

### RB (without tips)

**Effortless and secure handling** - single-handed opening/closing of rack box / secure rack box closure / stackable

**Universal fit** - suits multi-channel pipettes (standard 9 mm SBS footprint)

**Easy tip identification** - colour-coded insert plates for easy volume ID

**Rack boxes** - small & large sizes / racks in 8x12 format

## EL<sup>3</sup> Tips

**Designed for optimal performance** - with Rainin<sup>®</sup> LTS<sup>®</sup> style pipettes

**Cylindrical tip and shaft mechanism** - innovative tip design of the tips ensures a perfect fit, and EL<sup>3</sup> technology eliminates high force to deliver much more comfortable pipetting experience

**Positive stop** feature enables the tips to be attached and removed quickly and effortlessly, while ensuring a perfect seal between the pipette and the tip

**Colour-coded trays** - for easy identification of tip and pipette volume

**Graduation marks used for visual control** - to facilitate identification and minimise the risk of errors during pipetting

**Materials** - Certified free of RNase, DNase, PCR Inhibitors, Endotoxins and Pyrogens. US FDA approved medical grade virgin polypropylene plastic without any trace of metals, highly transparent and clear

**Manufacture** - in Class 100K cleanroom facility with automated manufacturing

**Versions** - available in rack, reload, eco-rack

## Dynex<sup>®</sup> Type Robotic Tips

**NEW  
PRODUCT**

**Usage** - recommended for use with Dynex DSX<sup>®</sup> and DS2<sup>®</sup> instruments

**Efficiency** - produced with tighter tolerances compared to those used with handheld pipettes, enhancing efficiency when integrated with automation platforms.

**Manufacture** - Manufactured in a modern production line and under cleanroom conditions.

**Quality** - meet the highest quality standards and deliver the reliability required for efficient and cost-effective laboratory operations.

**Colour** - distinctive blue sample tips enable easy visual tip identification

**Raw materials** - USP class VI resins ensure biocompatibility and safety in sensitive lab applications.

**Validation** - Tips are rigorously validated on the actual instrument for which the tip is created

**Sizes** - Available in 300  $\mu$ L and 1300  $\mu$ L volume

**Deep well dilution strips** available with Strip of 8 wells in PP material / suitable for use on third party robotic instruments like Dynex<sup>®</sup> DSX<sup>®</sup> and DS2<sup>®</sup>

## Tecan<sup>®</sup> Type Robotic Tips

**Exceptional results** when paired with LiHa<sup>®</sup> Arms.

**Versatility** - whether you are working with the Freedom EVO<sup>®</sup>100, 150, or 200 with Liquid Handling Arm, or the Freedom EVO<sup>®</sup>75 8+1, when it comes to automated liquid handling, nothing surpasses the AHN Robotic Tips for Tecan<sup>®</sup>.

**Premium-grade virgin polypropylene** - durability and reliability

**Tips options** - carbon-embedded conductive black or clear tip

**Polyethylene filter** - effectively prevents aerosol contamination

**Made from USP class VI resins** - and certified free of Endotoxin, Heavy Metals, RNase, DNase and DNA free

**Pick from non-sterile, sterile and filtered sterile formats** - depending on your application

**Manufactured in ISO-certified 9001 and 13485, 100K cleanroom facility** - to meet the highest quality standards

**Validated** - on the actual instrument for which the tip is created, to ensure seamless integration

**Colour-coded polycarbonate tray** - quickly identify volumes

**Packaging** - blister packs / eco-friendly flip card box

## Myra<sup>®</sup> Type Robotic Tips

**Usage** - ahn myTip<sup>®</sup> Myra<sup>®</sup> type Robotic Tips are designed to be used with Bio Molecular Systems Myra<sup>®</sup> liquid handling system

**Raw material** - manufactured using USP Class VI resins that are engineered to create a highly durable and superhydrophobic inner surface

**No sample loss** - these high quality low retention tips have been designed to eliminate any sample retention and reduce any binding of DNA, RNA or proteins

**Filtered Tips** - prevent any liquid bypass, cross contamination and airborne contamination and protects the pipette body from contamination

**Certified Purity** – free of RNase, DNase and Pyrogen

**Manufacture** - produced on a state-of-the-art production line and under stringent cleanroom conditions to ensure the highest quality and cleanliness standards

25

## PCR Tubes

0.2 mL

26

### Elimination of contamination and loss of sample

- high-quality raw material meets high standards for purity, is extremely resistant to extreme mechanical strain and has excellent chemical resistance

**Improved sample recovery** - the V-shape bottom guarantees easier sample recovery

### Reduced cycle time and optimal heat transfer

- guaranteed by the extra thin, uniform wall thickness of the tube

**Optical measurement** - high transparency of PCR tubes enables use in applications where the optical qPCR signal comes from the bottom of the tubes

**Certified Purity** - free of DNase, RNase, human DNA, PCR inhibitors and endotoxins

**Centrifuge specifications:** up to 6000 x g

**Effortless and secure working** - ergonomic flat cap design allows opening and closing with one hand

**Autoclavable** - 121°C / 15 min

**Sterile handling** - each lot is manufactured under strict sterile conditions

## PCR and qPCR Strips

8 x 0.1 mL | 8 x 0.2 mL

**Optical measurement** - high transparency PCR strips allows use in applications where the optical qPCR signal comes from the bottom of the tubes / ultra clear caps for qPCR with optical reading through the cap

**Compatibility** - the 0.1 mL strips are particularly recommended for fast thermocyclers requiring low profile tubes and the 0.2 mL strips are perfect for the standard thermocyclers requiring regular profile tubes. Compatibility charts are available on request

**Reduced cycle time and optimal heat transfer** - guaranteed by extra thin, uniform wall thickness of the tube

**Sterile handling** - each lot is manufactured under strict sterile conditions

**Certified purity** - free of DNase, RNase, human DNA, PCR inhibitor and Endotoxin

**Autoclavable** - 121°C / 15 min

**Reproducible result** - evaporation rate below 5%

**Versions** - available as 0.1 mL and 0.2 mL PCR strip tubes, with separate or attached caps options

## PCR and qPCR Plates

40 µL | 0.1 mL | 0.2 mL

**Optimal format** - non-skirted, semi-skirted, sub semi-skirted, fully skirted - options suit specific needs, offering versatility with various PCR thermocyclers / workflows

**Profile** - low (0.1 mL) / regular profile (0.2 mL) PCR plates

**Alpha-numeric coding** - supports easy identification of the location of individual wells, making it convenient to keep track of samples during experiments / white pcr plates with black printed alpha-numeric coding

**Raised well rim** - raised well rim design ensures a secure sealing with film, preventing evaporation and maintaining the integrity of the samples

**Frosted colour** - significantly increases qPCR signal-to-noise ratios, improving the accuracy and reliability of the experimental results

**White colour** - improves contrast and visibility of the signals, enabling better detection and analysis of qPCR reactions

**Certified Purity** - free of DNase, RNase, human DNA, PCR inhibitors, pyrogens and ATP

**Sterile handling** - PCR plates are autoclavable (121°C / 15 min)

**Sealable** - use disposable adhesive for secure closure

**Compatibility list** - see page 97

**Usage** - membranes are designed for PCR and qPCR applications and for storage

**Reproducible result** - evaporation rate below 5 %

**Certified purity** - free of DNase, RNase, DNA, PCR Inhibitor, ATP and endotoxin

**Ultra clear membranes** - the optical sealing membranes 3-048-01-0 and 3-048-02-0 show consistent and high light-transmitting rates for stable data

**Small packaging units** - to avoid contamination by different researchers

**Removable tabs at both ends** - for easy attachment and removal

## Deep Well Plates

1.0 mL | 2.0 mL | 2.2 mL

**Contaminant-free** - manufactured in a class 100K cleanroom facility

**Certified purity** - free of DNase, RNase and endotoxin inhibitors

**Fully autoclavable** - thermostable to 121°C, AHN myPlate<sup>®</sup> Deep Well Plates are autoclave-ready for easy sterilisation and decontamination after use. Safe for use in high-temperature protocols up to 121°C

**Freezer-ready** - excellent low temperature stability, AHN myPlate<sup>®</sup> Deep Well Plates can be used for sample and reagent storage in refrigerators and freezers. Safe for use on low temperatures up to a limit of -80°C

**Alphanumeric sample index** - feature an intuitive, embossed sample index with alphanumeric code for easy well identification

**ANSI compliant** - including ANSI/SLAS standards for microplate dimensions ensuring universal compatibility with standard handling platforms

**Easy stacking** - compact design saves space on workbench or in storage

**Raised-rim design** - minimises cross-contamination across sample wells, and feature a subtle raised-rim design around the opening of each well

**Compatibility list** - see page 98

Micro Tubes 0.5 mL | 1.5 mL | 2.0 mL  
MCT

**Effortless and secure handling** - ergonomic cap design with hinge orientation nibs (1.5 mL / 2.0 mL) and safe click lock, allowing an easy and secure opening and closing of the tube / bottom and cap have no sharp points, gloves will not be damaged / cap of the tube is puncturable

**Quick and simple volume check** - tubes are equipped with precise graduation marks / 1.5 mL tube with 0.2 mL extra space and 0.5 mL tube with 0.1 mL extra space for freezing / boiling purposes

**Easy sample identification** - frosted area for easy marking

**Optical measurement** and unsurpassed clarity

**Elimination of contamination and loss of sample** - high-quality raw material meets standards of purity and is highly resistant to mechanical strain and has an excellent chemical resistance

**Centrifuge specifications:** up to 20000 x g - 0.5 mL tube up to 25000 x g - 1.5 mL / 2.0 mL tube

**Certified Purity** - free of DNase, RNase, human DNA, pyrogen, ATP and endotoxin

**Maintain sample integrity** - sterile version available

**Sterile handling** - micro tubes are autoclavable (opened 121°C / 15 min)

## Centrifuge Tubes 15 mL | 50 mL CT

**Elimination of contamination of sample** - USFDA approved high quality raw material meets purity standards

**Centrifuge Tube** with screw flat cap

**Easy sample identification** - large writing area on tube

**Quick, volume check** - clear, precise graduation marks

**No loss of sample** - tube resists high centrifugal force and temperature variations (-80°C to +121°C)

### Centrifuge specifications:

up to 17.000 RCF - 15 mL centrifuge tube

up to 20.000 RCF - 50 mL centrifuge tube

up to 7.000 RCF - 50 mL centrifuge tube (self-standing)

**Comfortable handling** - the 3/4th turn closure enables loosening and tightening by single-handed operation

**Sterile handling** - autoclavable (opened 121°C / 15 min)

**Maintain sample integrity** - sterile version available (by gamma irradiation), non cytotoxic & biologically inert, BPA Free

**Certified purity** - free of DNase, RNase, human DNA and endotoxin

**Versions** - 50 mL tubes are non-skirted or self-standing (skirted)

**Extractable and Leachable (E&L)** - profile available

**TSE/BSE Compliant**

Self-standing (skirted)

# ahn<sup>®</sup> reagent Reservoirs

**Construction** - formulated from of a unique blend of polystyrene

**Extra large, sturdy base with broad edges** - enables it to stand fir mLy on your work bench

**Graduation marks** - helps identify any remaining liquid and facilitates easy, accurate dispensing

**Angled interior** - helps the collection of the liquid and decreases reagent waste

**Spillproof** - no need to worry about sample spillage while you are processing liquids

**Easy pouring** - to store any remaining liquid you can empty the reservoir using the corner spouts

**Compact storage** - easy to stack and the lip at the bottom of the reservoir allows them to be easily separated from each other

33

## Ideal for using with all AHN Single and Multi-channel Pipettes

- our reservoirs come in three different sizes, to suit various pipettes:

- ① 10 mL, V-shaped bottom (ideal with 8- and 16-channel pipettes)
- ② 25 mL, flat bottom (ideal with multi-channel pipettes)
- ③ 50 mL, V-shaped bottom (ideal with 12-channel pipettes)

contact@ahn-bio.com

www.ahn-bio.com

**Superior quality, contaminant-free petri dishes** - manufactured in a cleanroom facility, resulting in aseptic dishes

**Certified purity** - free of endotoxin and pyrogen

**Space-saving** - with a standard sized diameter of 91.5 mm, AHN Petri Dishes have the perfect balance between plating area and space-saving dimensions. These dishes benefit from being both lightweight and fully stackable - raised rim allows easy stacking by hand without slipping or scratching

**Excellent airflow** - supplied in vented and non-vented formats to accommodate different microbial culture needs. Vented plates have a lip that allows for airflow and moisture control whilst non-vented dishes limit airflow and maximise moisture retention.

**High-quality material** - made of high-quality polystyrene that meets the specifications of US FDA regulation 21 CFR 177.1640

**Product traceability** - each batch is supplied with a traceable lot number as well as information on sterility and expiration

**Compatibility** - fully compatible with medium-throughput carousel-based media preparation systems / Compatibility Chart is available on request

**Packaging Options** - available in 24x20 packs with grid and 25x20 packs

## Serological Pipettes SP

**Material** – made of USP CLASS VI Polystyrene

**Filter barrier** – equipped with a polyolefin (PO) filter to prevent the sample, as well as any aerosol or water vapor, from entering the pipette. It prevents the sample from being contaminated by any impurities in the pipette and prevents cross-contamination

**Clear and precise graduation marks** – up to an accuracy of  $\pm 2\%$  of the total volume

**Dual graduation** – for easy identification of volume

**Negative graduations** – for additional pipetting volume

**Colour coding** – the pipette head is marked with different colour codes, for easy identification of the pipette range and model

**Certified Purity** – free of DNase, RNase, non-pyrogenic

**Optimized pipette head** – for compatibility with most kinds of pipettor

**Sterile** – by irradiation to SAL 10<sup>-6</sup>

**Packaging** - individually blister packed in peel-to-open paper / plastic wrap

**Timeless Tool** - versatile and indispensable instrument designed for aspiration and dispensing, making it essential across a range of fields and applications

**Wide Applications** - Widely used in self-detection kits, student laboratories, plant tissue culture, soil chemistry studies, the food and dairy industries, as well as in animal cell culture and microscopy, providing precision and ease in each setting

**Medical Grade LDPE** - Crafted from non-toxic, medical-grade LDPE material that meets stringent US FDA standards, ensuring safety and reliability in various scientific and industrial environments

**Easy Usage** - Designed with a soft, elastic aspirating ball for smooth and effortless pipetting, making it user-friendly even for extended periods of use

**Precise Dispensing** - Features a smooth orifice for controlled and precise dispensing, accompanied by clearly visible external graduations on a highly transparent and clear surface for accurate measurements

**Flawless Finish** - Manufactured in a class 100k cleanroom, ensuring a smooth internal surface that prevents contamination and maintains the highest standards of quality and cleanliness

**Certified Purity** - free of DNase, RNase, pyrogens, endotoxins, human DNA, and PCR inhibitors

**Variants** - Available in both 1 mL and 3 mL sizes, offering flexibility to suit various needs and applications

## Cryo Vials

38

**Leak-proof design** - external thread design which reduces the risk of contamination without adding any bulkiness to the cryo vial design / lip seal that guarantees leak-proof sample storage

**High-quality material** - the cryo vials are made from US FDA 21 CFR compliant raw material

**Temperature stability** - a large thermal range (-196°C to +121°C) / each vial is designed to sustain temperatures as low as -196°C (in the vapour phase of liquid nitrogen) / the vials can be sterilised by autoclaving at 121°C to minimise the risk of sample cross-contamination

**Certified Purity** - free of RNase, DNase, human DNA, PCR-Inhibitors, Pyrogens and ATP

**Maintain sample integrity** - sterile version available (beta irradiation)

**Ergonomic** - extremely slim shape of the vials for comfortable handling / quick-seal caps facilitate the single-handed opening and closing of the vials, using only half a turn

**Star-shaped foot base** - ensures stability during single-handed operation and storage

**Straight body** - fits easily into 9x9 and 10x10 cryo box dividers

**Large writing area** - for easy labelling

**Quick and easy volume check** - vials have clear graduation marks on 1 mL / 2 mL / 4 mL / 5 mL cryo vials

**Coloured cap inserts** - for easy identification of different samples

### Plastic Cryo Boxes with 10x10 grid 130 x 130 mm

**10x10 grid** – offers 23% more storage and is ideal for laboratories storing large numbers of samples

**Durability** - high-quality polypropylene (PP)

**Temperature resistant** - withstand temperatures -90° to +121°C for reliable cryo vial storage and easy autoclaving

**Star-foot lock at the bottom of each box well** - enabling one-handed tube opening (only with suitable tube) without taking the tube out of the box, fits perfectly with ahn maxxLine cryo vials with star-shaped foot base

**Easy sample organisation** - moulded alpha-numeric coding on the lid and bottom of each box enable sample location with the box opened or closed

**Slanted edges** – for easier identification and handling

**Bottom vent holes** – rapidly increases freezing time and allow liquid drainage

**Transparent lids** - make it easy to see contents

**Height options** – 32 mm, 40 mm, 50 mm, 80 mm and 90 mm

**Easy sample sorting** – with coloured bottoms in blue, green, red, yellow as well as in clear

### Plastic Cryo Boxes with 9x9 grid 130 x 130 mm

**9x9 grid** – fit for most storage applications

**Durability** - high-quality polypropylene (PP)

**Temperature resistant** - withstand -90° to +121°C for reliable cryo vial storage and easy autoclaving

**Easy sample organisation** - moulded alpha-numeric coding on box lid and bottom enable sample location with the box opened or closed

**Bottom vent holes** – rapidly increases freezing time and allow liquid drainage

**Transparent lids** - make it easy to see contents

**Height options** – 50 mm, 80 mm and 90 mm

**Easy sample sorting** – with coloured bottoms in blue, green, red, yellow as well as in clear

**Durability** - high quality cardboard boxes feature a very hard-wearing, water-repellent coating which protects them from moisture damage and makes them extra resistant to alcohols and mild organic solvents

**Temperature resistant** - withstand temperatures as low as -80°C without any loss of integrity

**Eco-friendly** - fully recyclable, environmentally-friendly materials with low carbon footprint

**Available to two footprints** - 133x133 mm is particularly suited to space-constrained laboratories / 136x136 mm perfect for large sample storage demands

**Height options** - 32 mm, 50 mm, 75 mm, 100 mm and 130 mm suitable for different tube heights

**Easy sample sorting** - multiple colours boxes available: white, blue, green, red and yellow

**Labeling option** - Write-on surface

**Optional cardboard dividers** - can be used to store a wide range of laboratory items

## Storage Solutions

Reliable storage that  
ensures repeatability in  
every experiment you do

+49(0)3631/65242-0

contact@ahn-bio.com

www.ahn-bio.com

**Volume Range** - 125 mL to 3 litres

**User-Friendly Design** - Graduated markings for quick and easy visibility, allowing precise measurements

**High-Quality Material** - Made of USP Class VI material with low leachable and extractables to maintain sample purity

**Cleanroom Manufactured** - Produced in a Class 100K cleanroom, ensuring superior quality and cleanliness

**Variants** – PETG/PC with HDPE cap. Available with vented and non-vented caps to suit different applications

**Durable and Safe** - The crystal clear PETG construction is both robust and break-resistant, enhancing personal safety and ensuring the safety and integrity of your samples

**Versatile Applications** - Ideal for bioprocessing cell culture suspension, media preparation, mixing, and storage

**Autoclavable** - PC version

**Temperature** - -40 to 70°C (PETG), -80 to 130°C (PC)

**Robust** - Leakproof and shatterproof

**Certified purity** - RNase/DNase-free, Noncytotoxic and Nonpyrogenic

**Sterilised by gamma irradiation** - per ISO 11137-2 (SAL 10<sup>-6</sup>)

**Available in Individually packaged EZ-Tear bag** - sterilised for immediate use

**Vented cap** - with Hydrophobic 0.2µm PTFE filter for continuous gas exchange while ensuring sterility and preventing leakage

Flat bottom

Baffled bottom

**Volume** – square shaped, in 30 mL to 2L, with graduated markings

**Design** - high-quality PETG/PET materials, minimises additives and leachables. Suits biopharmaceutical processing, critical reagent storage

**Security** - shatterproof/leakproof for sample integrity/tamper-proof seals

**Easy-to-clean** - smooth surface prevents residue build-up

**Manufactured** in Class 8 cleanroom from USP Class VI Raw material

**Temperature resistant** - from 60°C to -70°C

**Filter/plasticiser-free** - uncompromised sample integrity

**Versatile** - Gamma sterile, non-pyrogenic, non-cytotoxic. TSE/BSE Compliant and BPA Free material. Compliant to ISO 10993

**PC Media Bottles** are available on request

**Material** - US FDA approved raw material of USP class VI, low leachable and extractable. High density polyethylene (HDPE), low density polyethylene (LDPE) and polypropylene (PP) configurations. for chemical resistance and thermal stability

**Caps** - All caps are made of polypropylene material

**Colour** - translucent and amber colour variants

**Freezer-friendly** LDPE / HDPE can withstand temperatures from -100 to 120°C.

**PP versions** are heat-stable 0 to 135°C, making them perfect for autoclaving

**Sizes** - Narrow mouth Bottles sizes include 4 mL, 8 mL, 15 mL, 30 mL, 60 mL, 125 mL, 250 mL, 500 mL, 1L, 2L and 4L sizes. Wide mouth bottles come in 30 mL, 60 mL, 125 mL, 175 mL, 250 mL, 500 mL, 1L, 2L and 4L sizes

**Chemically resistant/leakproof** - suited to both short and long-term storage

**Manufacturing** - made in Class 100K cleanroom facility

## Carboys

**NEW  
PRODUCT**

**Range of Applications** - from dispensing DI water to mixing reagents, bulk vaccines and media

**Secure** - leakproof design ensures safe transport

**Round bottom** - ensures even mixing and curved inner corners for easy cleaning

**Premium Materials** - made from USFDA approved raw material for high quality, durability and safety / available in PP, HDPE, and LDPE, ranging from 10L to 50L, with both sterile and non-sterile options

**Versatile** - ideal for storage, mixing, dispensing, and transporting liquids

**User-Friendly** - ergonomic handles, wide-mouth openings, and spigot for easy use

**Options** - various materials and capacities

**Precise Identification** - unique lot numbers and laser printed graduations

**Certified** USP Class VI material and animal component free

**Compliant** to ISO 10993/TSE/BSE Free and BPA Free

**Profiles** - Extractable and Leachable (E&L) Profile available

**Sterility** - Available with sterility assurance level 10<sup>-6</sup> as per ISO 11137

**Optional with unique serial number** - for easy identification based on customer requirement

Printed graduations

Carboy spigot

## Jerrycans

NEW  
PRODUCT

**Secure transit** - leakproof design ensures safe transport

**Premium materials** - made from USFDA approved raw material for high quality and safety

**Innovative Design** - Features a unique jerrycan mouth design that ensures a smooth and controlled liquid flow, reducing spills and making pouring easier and more efficient

**Space-Efficient** - The rectangular shape of the jerrycans is specifically designed to optimize storage space, allowing for better organization and more efficient use of limited areas

**Anti-Wobbling Mouth** - prevents splashing of liquids

**Durable Construction** - made from premium virgin-grade resins, they offer exceptional durability, ensuring they can withstand rigorous use and provide long-lasting performance

**Ergonomic Handling** - Designed with a convenient shoulder handle, they provide a comfortable grip, making them easy to carry, even when full, and reducing strain during transport

**Clear Graduations** - marked with individually printed graduations and a Lot Number, ensuring precise measurement and traceability, which is crucial for accuracy in various applications

**Easy Cleaning** - The design includes curved inner corners, making cleaning and maintenance simple and hassle-free, ensuring hygiene and preventing contamination from residue buildup

**Versatile Applications** - Perfect for a range of uses including storage, mixing, dispensing, and transporting liquids in various industries, providing flexibility for multiple tasks
